# SAFETY DATA SHEET

### **SECTION 1**

### PRODUCT AND COMPANY IDENTIFICATION

**PRODUCT** 

Product Name: MOBILTAC 275 NC

Product Description: Hydrocarbons and Additives

**Product Code:** 201560404005

Intended Use: Gear oil

**COMPANY IDENTIFICATION** 

Supplier: VAD Ltd. (Antigua)

Fort Road PO Box 359

St. John's Antigua/Barbuda

**24 Hour Health Emergency** +1 703-741-5970 (CHEMTREC) **Supplier General Contact** +1 703-741-5970 (CHEMTREC)

**SECTION 2** 

# HAZARDS IDENTIFICATION

This material is not hazardous according to regulatory guidelines (see (M)SDS Section 15).

Other hazard information:

HAZARD NOT OTHERWISE CLASSIFIED (HNOC): None as defined under 29 CFR 1910.1200.

# PHYSICAL / CHEMICAL HAZARDS

No significant hazards.

### **HEALTH HAZARDS**

High-pressure injection under skin may cause serious damage. Mildly irritating to skin. May be irritating to the eyes, nose, throat, and lungs.

### **ENVIRONMENTAL HAZARDS**

Expected to be harmful to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

NFPA Hazard ID: Health: 1 Flammability: 1 Reactivity: 0
HMIS Hazard ID: Health: 1 Flammability: 1 Reactivity: 0

**NOTE:** This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

# **SECTION 3**

# **COMPOSITION / INFORMATION ON INGREDIENTS**

Revision Date: 14 Jun 2022

Page 2 of 11

This material is defined as a mixture.

Hazardous Substance(s) or Complex Substance(s) required for disclosure

| Tiazar ada Gastarios (e) or Goripiox Gastarios (e) require a for alcolocare |            |                |                         |  |
|---|------------|----------------|-------------------------|--|
| Name  | CAS#       |                | GHS Hazard Codes        |  |
|   |            | Concentration* |                         |  |
| DISTILLATES (PETROLEUM), HYDROTREATED LIGHT                                 | 64742-47-8 | 5 - < 10%      | H304                    |  |
| DISTILLATES (PETROLEUM), HYDROTREATED LIGHT                                 | 64742-47-8 | 5 - < 10%      | None                    |  |
| DISTILLATES (PETROLEUM), HYDROTREATED MIDDLE                                | 64742-46-7 | 5 - < 10%      | H304, H332, H315, H401, |  |
|   |            |                | H411                    |  |
| GRAPHITE  | 7782-42-5  | 5 - < 10%      | None                    |  |
| ZINC NEODECANOATE   | 27253-29-8 | 1 - < 5%       | H412                    |  |

<sup>\*</sup> All concentrations are percent by weight unless material is a gas. Gas concentrations are in percent by volume.

As per paragraph (i) of 29 CFR 1910.1200, formulation is considered a trade secret and specific chemical identity and exact percentage (concentration) of composition may have been withheld. Specific chemical identity and exact percentage composition will be provided to health professionals, employees, or designated representatives in accordance with applicable provisions of paragraph (i).

# **SECTION 4**

# **FIRST AID MEASURES**

#### **INHALATION**

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

#### SKIN CONTACT

Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury.

#### **EYE CONTACT**

Flush thoroughly with water. If irritation occurs, get medical assistance.

### **INGESTION**

First aid is normally not required. Seek medical attention if discomfort occurs.

# **SECTION 5**

# **FIRE FIGHTING MEASURES**

### **EXTINGUISHING MEDIA**

**Appropriate Extinguishing Media:** Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

Inappropriate Extinguishing Media: Straight Streams of Water

# **FIRE FIGHTING**

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering

Revision Date: 14 Jun 2022

Page 3 of 11

streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

**Hazardous Combustion Products:** Aldehydes, Incomplete combustion products, Oxides of carbon, Smoke, Fume, Sulfur oxides

#### FLAMMABILITY PROPERTIES

Flash Point [Method]: >160°C (320°F) [ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

**Autoignition Temperature:** N/D

### **SECTION 6**

### **ACCIDENTAL RELEASE MEASURES**

#### **NOTIFICATION PROCEDURES**

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

### PROTECTIVE MEASURES

Avoid contact with spilled material. Warn or evacuate occupants in surrounding and downwind areas if required due to toxicity or flammability of the material. See Section 5 for fire fighting information. See the Hazard Identification Section for Significant Hazards. See Section 4 for First Aid Advice. See Section 8 for advice on the minimum requirements for personal protective equipment. Additional protective measures may be necessary, depending on the specific circumstances and/or the expert judgment of the emergency responders.

### **SPILL MANAGEMENT**

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

**Water Spill:** Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

### **ENVIRONMENTAL PRECAUTIONS**

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

# **SECTION 7**

# HANDLING AND STORAGE

# **HANDLING**

Avoid contact with skin. Prevent small spills and leakage to avoid slip hazard. Material can accumulate static charges which may cause an electrical spark (ignition source). When the material is handled in bulk, an electrical spark could ignite any flammable vapors from liquids or residues that may be present (e.g., during

Revision Date: 14 Jun 2022

Page 4 of 11

switch-loading operations). Use proper bonding and/or ground procedures. However, bonding and grounds

may not eliminate the hazard from static accumulation. Consult local applicable standards for guidance. Additional references include American Petroleum Institute 2003 (Protection Against Ignitions Arising out of Static, Lightning and Stray Currents) or National Fire Protection Agency 77 (Recommended Practice on Static Electricity) or CENELEC CLC/TR 50404 (Electrostatics - Code of practice for the avoidance of hazards due to static electricity).

**Static Accumulator:** This material is a static accumulator.

#### STORAGE

The type of container used to store the material may affect static accumulation and dissipation. Do not store in open or unlabelled containers.

# **SECTION 8**

# **EXPOSURE CONTROLS / PERSONAL PROTECTION**

### **EXPOSURE LIMIT VALUES**

Exposure limits/standards (Note: Exposure limits are not additive)

| Substance Name   | Form                 | Limit / Sta  | ndard         |         | NOTE | Source     |
|--|----------------------|--------------|---------------|---------|------|------------|
| DISTILLATES (PETROLEUM), HYDROTREATED LIGHT [Total Hydrocarbons] | Vapor.               | RCP -<br>TWA | 1200<br>mg/m3 | 166 ppm | N/A  | ExxonMobil |
| DISTILLATES (PETROLEUM),<br>HYDROTREATED MIDDLE                  | Mist.                | TWA          | 5 mg/m3       |         | N/A  | OSHA Z1    |
| DISTILLATES (PETROLEUM),<br>HYDROTREATED MIDDLE                  |                      | TWA          | 5 mg/m3       |         | N/A  | ExxonMobil |
| DISTILLATES (PETROLEUM),<br>HYDROTREATED MIDDLE                  | Inhalable fraction.  | TWA          | 5 mg/m3       |         | N/A  | ACGIH      |
| GRAPHITE   | Respirable fraction. | TWA          | 5 mg/m3       |         | N/A  | OSHA Z1    |
| GRAPHITE   | Total dust.          | TWA          | 15 mg/m3      |         | N/A  | OSHA Z1    |
| GRAPHITE   | Inhalable particles. | TWA          | 10 mg/m3      |         | N/A  | ACGIH      |
| GRAPHITE   | Respirable fraction. | TWA          | 2 mg/m3       |         | N/A  | ACGIH      |

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

No biological limits allocated.

#### **ENGINEERING CONTROLS**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

# PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications,

Revision Date: 14 Jun 2022

Page 5 of 11

handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

**Respiratory Protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No protection is ordinarily required under normal conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

**Hand Protection:** Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Chemical resistant gloves are recommended.

**Eye Protection:** If contact is likely, safety glasses with side shields are recommended.

**Skin and Body Protection:** Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

Chemical/oil resistant clothing is recommended.

**Specific Hygiene Measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### **ENVIRONMENTAL CONTROLS**

Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.

# **SECTION 9**

### PHYSICAL AND CHEMICAL PROPERTIES

Note: Physical and chemical properties are provided for safety, health and environmental considerations only and may not fully represent product specifications. Contact the Supplier for additional information.

# **GENERAL INFORMATION**

Physical State: Liquid

Color: Black

Odor: Characteristic Odor Threshold: N/D

# IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 15 °C): 1 Flammability (Solid, Gas): N/A

Flash Point [Method]: >160°C (320°F) [ASTM D-92]

Revision Date: 14 Jun 2022

Page 6 of 11

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/D

**Boiling Point / Range:** 174°C (345°F) - 260°C (500°F)

**Decomposition Temperature:** N/D **Vapor Density (Air = 1):** N/D **Vapor Pressure:** [N/D at 20 °C]

**Evaporation Rate (n-butyl acetate = 1):** < 1

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): > 3.5 [Estimated]

Solubility in Water: Negligible

Viscosity: >20.5 cSt (20.5 mm2/sec) at 40 °C

Oxidizing Properties: See Hazards Identification Section.

OTHER INFORMATION

Freezing Point: N/D Melting Point: N/A

#### SECTION 10 STABILITY AND REACTIVITY

**REACTIVITY:** See sub-sections below.

**STABILITY:** Material is stable under normal conditions.

**CONDITIONS TO AVOID:** Excessive heat. High energy sources of ignition.

**MATERIALS TO AVOID:** Strong oxidizers

**HAZARDOUS DECOMPOSITION PRODUCTS:** Material does not decompose at ambient temperatures.

POSSIBILITY OF HAZARDOUS REACTIONS: Hazardous polymerization will not occur.

# SECTION 11 TOXICOLOGICAL INFORMATION

# **INFORMATION ON TOXICOLOGICAL EFFECTS**

| Hazard Class                                    | Conclusion / Remarks  |  |  |
|---|---|--|--|
| Inhalation                                      |   |  |  |
| Acute Toxicity: No end point data for material. | Minimally Toxic. Based on assessment of the components.   |  |  |
| Irritation: No end point data for material.     | Elevated temperatures or mechanical action may form vapors, mist, or fumes which may be irritating to the eyes, nose, throat, or lungs.                       |  |  |
| Ingestion                                       |   |  |  |
| Acute Toxicity: No end point data for material. | Minimally Toxic. Based on assessment of the components.   |  |  |
| Skin  |   |  |  |
| Acute Toxicity: No end point data for material. | Minimally Toxic. Based on assessment of the components.   |  |  |
| Skin Corrosion/Irritation: Data available.      | Mildly irritating to skin with prolonged exposure. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 404 |  |  |

Revision Date: 14 Jun 2022

Page 7 of 11

| Eye  |  |
|--|--|
| Serious Eye Damage/Irritation: Data available.                 | May cause mild, short-lasting discomfort to eyes. Based on test data for structurally similar materials. Test(s) equivalent or similar to OECD Guideline 405 |
| Sensitization  |  |
| Respiratory Sensitization: No end point data for material.     | Not expected to be a respiratory sensitizer.   |
| Skin Sensitization: No end point data for material.            | Not expected to be a skin sensitizer. Based on assessment of the components.   |
| Aspiration: No end point data for material.                    | Not expected to be an aspiration hazard. Based on physico-<br>chemical properties of the material.   |
| <b>Germ Cell Mutagenicity:</b> No end point data for material. | Not expected to be a germ cell mutagen. Based on assessment of the components.   |
| Carcinogenicity: No end point data for material.               | Not expected to cause cancer. Based on assessment of the components.   |
| <b>Reproductive Toxicity:</b> No end point data for material.  | Not expected to be a reproductive toxicant. Based on assessment of the components.   |
| Lactation: No end point data for material.                     | Not expected to cause harm to breast-fed children.   |
| Specific Target Organ Toxicity (STOT)                          |  |
| Single Exposure: No end point data for material.               | Not expected to cause organ damage from a single exposure.   |
| Repeated Exposure: No end point data for material.             | Not expected to cause organ damage from prolonged or repeated exposure. Based on assessment of the components.   |

#### **TOXICITY FOR SUBSTANCES**

| NAME                     | ACUTE TOXICITY  |
|--------------------------|---|
| DISTILLATES (PETROLEUM), | Inhalation Lethality: 4 hour(s) LC50 4.6 mg/l (Aerosol) (Rat) |
| HYDROTREATED MIDDLE      |   |

# OTHER INFORMATION

# For the product itself:

Repeated and/or prolonged exposure may cause irritation to the skin, eyes, or respiratory tract.

# Contains:

Molybdenum: High oral dosages have produced weight loss, anorexia, liver and kidney damage in animal studies. Few signs and symptoms in humans have been recorded during occupational exposure.

The following ingredients are cited on the lists below: None.

-- REGULATORY LISTS SEARCHED--

# SECTION 12 ECOLOGICAL INFORMATION

The information given is based on data for the material, components of the material, or for similar materials, through the application of bridging principals.

# **ECOTOXICITY**

Revision Date: 14 Jun 2022

Page 8 of 11

Material Expected to be harmful to aquatic organisms. May cause long term adverse effects in the

Material -- Expected to be harmful to aquatic organisms. May cause long-term adverse effects in the aquatic environment.

### **MOBILITY**

More volatile component -- Highly volatile, will partition rapidly to air. Not expected to partition to sediment and wastewater solids.

High molecular wt. component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

# PERSISTENCE AND DEGRADABILITY

#### **Biodegradation:**

Low molecular wt. component -- Expected to be inherently biodegradable

High molecular wt. component -- Expected to be persistent.

### **Atmospheric Oxidation:**

More volatile component -- Expected to degrade rapidly in air

### **BIOACCUMULATION POTENTIAL**

Majority of components -- Has the potential to bioaccumulate, however metabolism or physical properties may reduce the bioconcentration or limit bioavailability.

### **SECTION 13**

### **DISPOSAL CONSIDERATIONS**

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

# **DISPOSAL RECOMMENDATIONS**

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products. Protect the environment. Dispose of used oil at designated sites. Minimize skin contact. Do not mix used oils with solvents, brake fluids or coolants.

# REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

**Empty Container Warning** Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

### **SECTION 14**

#### TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

Revision Date: 14 Jun 2022

Page 9 of 11

**SEA (IMDG):** Not Regulated for Sea Transport according to IMDG-Code

Marine Pollutant: No

AIR (IATA): Not Regulated for Air Transport

# SECTION 15 REGULATORY INFORMATION

**OSHA HAZARD COMMUNICATION STANDARD:** This material is not considered hazardous in accordance with OSHA HazCom 2012, 29 CFR 1910.1200.

Listed or exempt from listing/notification on the following chemical inventories: AIIC, DSL, ENCS, IECSC, ISHL, KECI, PICCS, TCSI, TSCA

SARA 302: No chemicals in this material are subject to the reporting requirements of SARA Title III, Section 302

SARA (311/312) REPORTABLE GHS HAZARD CLASSES: None.

# SARA (313) TOXIC RELEASE INVENTORY:
